

16@95 Improvement Projects

Major Mobility Projects — P.I. Numbers: 0012757 and 0012758

Fact Sheet

What are the Projects?

The 16@95 Improvement Projects will improve traffic flow and enhance safety along I-16 and I-95, one of Georgia's busiest freight corridors as well as the gateway to Georgia's growing port in Savannah, by reconstructing the interchange at I-16 and I-95 in Chatham County to increase operational efficiency and safety of passenger cars and trucks and widening I-16 to relieve traffic congestion.

Things You Need to Know

- Widening I-16 mainline corridor toward the inside median from two to three lanes in each direction from I-95 to I-516
- Replacing the existing (I-95 southbound to I-16 eastbound and the I-16 westbound to I-95 southbound) loop ramps located on the west side of I-95 with "partial turbine" configuration ramps to provide smoother, more direct connections
- Adding a collector-distributor (CD) lane on I-95 northbound to help improve traffic flow and safety to and from I-16 and I-95
- Adding lighting at the I-16/I-95 Interchange
- Installing Intelligent Transportation System (ITS) technology, including cameras, and changeable message signs to provide real-time driving conditions
- Installing ramp meters at SR 307/Dean Forest Road and Chatham Parkway on-ramps
- Constructing a two-lane, emergency-use median crossover on I-16 between I-95 and SR 307/Dean Forest Road to aid in evacuations; Existing I-16 crossovers will remain operational until the new, two-lane crossover becomes operational
- Constructing/rehabilitating 12 bridges

What's the Status?

Construction is underway and scheduled for completion by Q4 2023. Motorists will continue to see construction activities along I-16 through the I-516 Interchange as well as significant bridge work in the I-16/I-95 Interchange.
